

DAVIDE BALDI

Results-driven Fullstack Developer with expertise in Web and Cloud applications. Skilled in building dynamic, scalable solutions using modern technologies such as HTML, CSS, JavaScript, TypeScript, React, Next.js, Vue, Nuxt and Node.js. Experienced with cloud platforms like AWS and GCP. Strong focus on responsive design, UI/UX best practices, API integration, and performance optimization. Proficient in secure authentication, component-based architecture, and Git-based workflows. Passionate about clean, maintainable code and continuous learning in emerging tech.

Core Competencies

- Experienced in building fully responsive and mobile-friendly applications using HTML, CSS, and JavaScript frameworks, ensuring optimal user experiences across all devices.
- Skilled in React, Next.js, Vue and Nuxt for creating dynamic, component-based applications with efficient state management and reusable UI components.
- Experienced in optimizing web performance through lazy loading, code splitting, caching strategies, and reducing unnecessary re renders in frontend applications.
- Knowledgeable in Node.js and Express.js, with experience designing RESTful APIs, managing server-side logic, and integrating third-party APIs for data handling and secure authentication. Familiar with databases like Supabase, MongoDB, and Firebase for flexible, scalable data storage solutions.
- Proficient in using Git, GitHub, and GitLab for version control, managing repositories, handling branches, and collaborating effectively in Agile development teams.
- Hands-on experience deploying and managing applications on AWS and Google Cloud Platform (GCP). Skilled in using services such as Cloud Run, Cloud Functions, Firebase Hosting, S3, EC2, and Lambda. Expert with GCP tools like BigQuery and Looker Studio for data analytics and visualization.

Professional Experience

Fullstack Developer - Intern

Nibiru Software AB Jan 2025 - Jul 2025

Contributed as a Fullstack Developer Intern by leading key infrastructure and product improvements across frontend, backend, and cloud operations. Migrated legacy projects from Vue 2 to Vue 3 using the Composition API, enhancing code clarity and future-proofing the codebase. Developed data pipelines using GCP Dataflow and BigQuery and built interactive dashboards with Looker Studio, enabling stakeholders to derive insights from complex datasets. Helped establish Google Cloud Platform best practices across the team, resulting in improved performance, reduced cloud spend, and more maintainable systems.

Key Achievements:

- Reduced monthly Google Cloud costs by 32% by auditing usage, rightsizing services, and implementing team-wide GCP cost-efficiency practices.
- Developed and integrated Solidity smart contracts, laying the groundwork for blockchain-based product functionality.
- Designed and queried complex BigQuery datasets, then visualized results in Looker Studio to drive data-informed decision-making.
- Migrated existing projects from Vue 2 to Vue 3 Composition API, improving scalability and enabling better modular development and efficiency.

Fullstack Developer - Intern

Parking Time AB Sep 2024 - Dec 2024

Developed a fully redesigned and optimized homepage with Next.js, ensuring a modern, user-friendly experience while resolving backend functionality issues to improve overall performance. Configured email services integrated with GoogleRecaptcha v3, Implemented Jest testing frameworks to enhance code reliability, ensuring smooth functionality and reducing potential errors before deployment. I also developed and maintained the internal Parking Dashboard, enabling real-time management of parking data and user interactions.

Key Achievements

- Designed and developed interactive UI dashboards using Material-UI, improving user navigation and accessibility across the platform.
- Designed and implemented a custom splash screen animation that was praised by the client for its visual appeal and branding impact.
- Managed API integrations, establishing efficient data flow between the front-end and back-end, optimizing response times and reducing latency.
- Strengthened security by implementing secure access token handling mechanisms, preventing unauthorized access and enhancing user authentication processes.
- Configured and integrated Sanity CMS for content management and implemented internationalization (i18n) for multilingual support.
- Wrote Jest tests to ensure UI stability and backend integration reliability during deployment.

Restaurant Manager

Barrels Burgers & Beers (Chinzo Söder AB) Jan 2021 - Jun 2023

Managed daily restaurant operations by overseeing staff schedules, monitoring service quality, and ensuring a seamless dining experience for customers. Supervised order management processes, coordinating with kitchen staff and suppliers to maintain inventory levels and minimize waste. Oversaw customer bookings, ensuring smooth table turnover and enhancing the overall guest experience through effective

reservation management.

Key Achievements:

- Maintained accurate financial records, preparing sales reports and monitoring revenue to optimize profitability.
- Worked closely with the accounting team to track expenses, manage payroll, and ensure timely vendor payments.
- Trained and mentored new staff members, fostering a productive work environment and improving service efficiency.

Restaurant Manager

Classic Pizza (Classic Pizza AB) Dec 2018 - Apr 2020

Led the hiring process by recruiting, interviewing, and selecting qualified candidates, ensuring a strong and motivated team. Provided comprehensive training for new employees, focusing on customer service excellence, operational efficiency, and food safety compliance.

Key Achievements:

- Managed staff performance through regular evaluations, constructive feedback, and ongoing coaching to maintain high service standards.
- Maintained direct communication with accountants and ownership to provide detailed financial reports, ensuring transparency in sales, expenses, and profitability.
- Assisted in budgeting and cost control by analyzing financial data, optimizing expenses, and identifying areas for revenue growth.

Tax Lawyer - Intern

DLA Piper Jun 2017 - Aug 2017

Assisted senior lawyers in researching and analyzing national and international tax regulations, ensuring compliance with evolving legal standards.

Key Achievements:

- Conducted detailed reviews of corporate financial statements to identify tax-saving opportunities and potential compliance risks.
- Supported the preparation of transfer pricing documentation, ensuring proper reporting and adherence to international tax laws.
- Collaborated with legal teams on group restructuring cases, analyzing tax implications and assisting in structuring tax-efficient corporate frameworks.

Infantry Soldier & Team Leader

Italian Army (1st Sardinia Regiment) Sep 2008 - Aug 2016 Led infantry teams in executing operational tasks and strategic missions, ensuring unit cohesion and mission success.

Key Achievements:

- Provided tactical guidance during field operations, assessing situations in real time to make informed decisions under pressure.
- Supervised and trained new recruits, equipping them with essential combat skills, weapon handling techniques, and survival strategies.

Skills

Frontend Development: HTML, CSS, JavaScript, TypeScript, EJS | React, Next.js, Vue, Nuxt.js | jQuery

Styling: Tailwind, SASS, Styled Components, Material-UI, Next-UI, Nuxt-UI, Framer Motion, Locomotive Scroll

Backend Development: Node.js, Express | Database Design: PostgreSQL, MongoDB, DynamoDB, Supabase | MERN Stack

DevOps & Tools: GIT, Docker, AWS, GitHub, GitLab | CI/CD, Cloud Computing

Testing: Mocha, Chai, Jest

Blockchain Development: Solidity, Web3.js, Ethers.js, Ganache, Infura, Metamask, Hardhat.js

AI / ML: VertexAI, TensorFlow.js, BigQueryML

Project Management & Other Tools: Agile Methodology (Scrum Master, Project Manager experience) | Linear, Jira, Microsoft 365 | API Development: Postman | Headless CMS: Sanity, Hygraph

Education

Futuregames AB | Frontend/App Developer | Sep 2023 - June 2025

2-year course covering **Web Development, Agile Methodologies, UX/UI, Git, and Cloud Technologies.**

Gained experience as **Scrum Master** and **Project Manager** in Agile teams.

Certifications

GCP Professional Data Engineer(ID:d3d66675403b4d39abb782b77c1d1884)

GCP Associate Data Practitioner(ID: 39e37beef025441f8bbb6bbbc40821a06)

GCP Digital Leader (ID: 9f3177294b964a7d8d6cbbf61ee2e86b)

AWS Cloud Practitioner (5502bddfb1554ba7a188370d8d257310)

Google Fundamentals of Digital Marketing (ID: 346998936)
